**Re: GC Docket 10-51 PowerVRS, LLC Internet-Based TRS Certification Application**

Dear Ms. Dortch:

Please find enclosed the application for certification for Internet-Based TRS Certification, which would, upon approval, allow PowerVRS to continue its video relay service and eventually, text relay service operations.

The information provided will demonstrate that PowerVRS meets or surpasses minimum standards delineated in the Federal Communications Commission Orders and Regulations dealing with VRS and text relay services that are reimbursed by the commission.

PowerVRS hereby requests that it be granted a telecommunications relay services certification by the required due date in order to permit it to provide uninterrupted service to its customers. Copies of these documents will be sent via mail and also electronically.

Your consideration of this application is greatly appreciated.

Very truly yours,

**THOMAS A. JAFFKE, PLC**

PowerVRS, LLC: Internet-Based TRS Certification Application

Re: CG Docket 10-51

Dear Ms Dortch,

Pursuant to Section 64.606(a)(2) of the Commission's rules, PowerVRS, LLC ("PowerVRS" or the "Company") hereby tenders the following documents entitled "The Internet-Based TRS Certification Application" for consideration and approval to continue its Video Relay Service ("VRS") and, eventually, Text Relay Services operations. PowerVRS will demonstrate from this point on that it has met and, in some cases, surpassed the minimum standards delineated in the Federal Communication Commission's ("Commission") Orders and regulations, which deal with the provision of VRS and Text Relay Services that are reimbursed by the Commission. PowerVRS hereby respectfully requests that it be granted a TRS ("Telecommunications Relay Services) certification by the due date in order for it to provide an uninterrupted service to its customers. Copies of these documents have been sent via mail and electronically.

PowerVRS appreciates your consideration on this matter.

Sincerely,

Patrick W. Reece

PowerVRS, President and Owner

## SUMMARY

Pursuant to Section 64.606(a)(2) of the Commission's rules, PowerVRS, LLC ("PowerVRS" or the "Company") hereby tenders the following documents entitled "The Internet-Based TRS Certification Application" for consideration and approval to continue its Video Relay Service ("VRS") and eventually, Text Relay Services operations. PowerVRS has been operational since April 12, 2010 and has been a subcontractor for a certified VRS provider in order to achieve functionality. It also follows a business model that reflects closely the integrity and intent of the Commission's Order and regulations.

Review of the documents will show that PowerVRS, meets and, in some cases, surpasses the minimum standards delineated in the Federal Communication Commission's ("Commission") Orders and regulations in Section 64.604. These Orders and regulations deal with the provision of VRS and Text Relay Services that are reimbursed by the Commission. As such, PowerVRS humbly asks that it be granted a TRS ("Telecommunications Relay Services) certification by the due date in order for it to provide an uninterrupted service to its customers.
